Powerbrush₂0

CHECK THIS OUT !

This unit requires only one person to operate and cleans the vehicle in less than 9 minutes using very little water.

Because your water usage is drastically reduced, you have less water to dispose of and this unit does not need floor mounted tracks or rails.

The soft brushes will not cause decals or expensive custom paint to peel off the vehicle surface.

This unit perfectly cleans the difficult areas such as window corners, around lights, and the top rub rails, eliminating streaks and runs.

800-447-1226

168 Ayer Road, Littleton, Massachusetts 01460
