

## TRAILER or TRUCKBED MOUNT SYSTEMS

*\*Trailer and Power Washer - Not Included\**

### Model# ATP50: Low cost wastewater recovery system, 120v

The ATP50 is your answer to capturing and containing wastewater runoff. The durable sump pump and water berms allow easy containment and transfer of excess wash water. Complete your task while protecting the environment and complying with regulations. A proven product for all concrete cleaners and anyone wanting to capture and transport wash water.

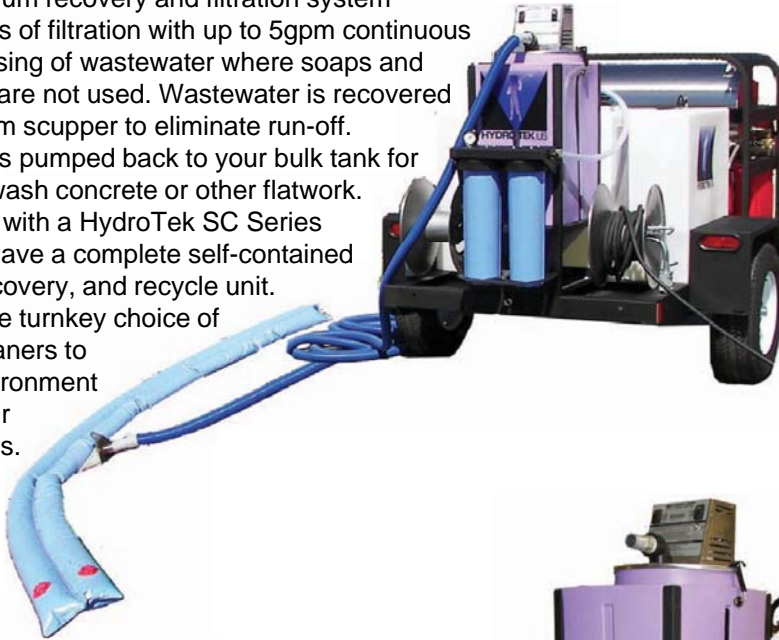

#### Features

- Recover up to 20gpm
- Filter wastewater up to 100 micron
- Transfer wastewater up to 100 feet
- Includes water berms, 120v sump pump with 25' hose
- 185 gallon black holding tank

### Model# AZV55: Vacuum recovery and filtration, 120v and 12vdc

The AZV55 vacuum recovery and filtration system provides 7 stages of filtration with up to 5gpm continuous 5-micron processing of wastewater where soaps and other chemicals are not used. Wastewater is recovered through a vacuum scupper to eliminate run-off. Recycled water is pumped back to your bulk tank for reuse to power wash concrete or other flatwork. When combined with a HydroTek SC Series and trailer, you have a complete self-contained mobile wash, recovery, and recycle unit. The system is the turnkey choice of Professional cleaners to Protect The Environment And Preserve our Natural resources.

#### Features

- Vacuum recovery rate over 5gpm, with auto shut-down
- Wastewater process rate 4.5gpm
- 7 stage filtration process, filters up to 5 micron
- 40 gallon capacity, with automatic pump out 12v, 15amp
- Replaceable filter cartridges
- Includes vacuum scupper w/50' hose, water berms, sand berms
- System engineered to be powered by Hydro Tek SC Series power washer - No external power required

### Model# RZVE1: Vacuum recovery and filtration with mount bracket, 120v

The RZVE1 vacuum recovery has the same features as the AZV55 but includes raised mounting brackets for simple installation on your existing truck or trailer. The vacuum and pump out are both 120 volts. Includes a 35' power cord with ground fault interrupter that can be plugged into a standard 120v wall outlet or a 3500 watt generator may be used for portability. (May not be powered by SC series 2900 watt generator)

Caution: Vacuum recovery may be inhibited if mounted higher than 30' from ground level

### Model# AZF05: Recovery and flatwork filtration, 120v and 12vdc

The AZF05 provides the same 5gpm, 5-micron processing as the AZV55 but without the vacuum recovery feature. The AZF05 recovers wastewater through the use of a sump pump down to 1/4" in depth.

#### Features

- Wastewater process rate 5gpm
- 7 stage filtration process, up to 5 micron
- Capture and Pump Wastewater
- 40 gallon capacity, with automatic pump out 12v, 15amp

- Replaceable Filter Cartridges
- Includes water berms, sand berms, and sump pump w/50' hose
- Engineered to be powered by Hydro Tek SC Series power washer - No external power required
